No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Sequence 4, Application US/09875353

Patent No. US20020168713A1

Patent No. US20020168713A1

Patent No. US20020168713A1

Patent No. US20020168713A1

Patent No. US20020168713A1

PATENT OF INVENTION: 46980, A NOVEL HUMAN NEUROLIGIN FAMILY

PATENT OF INVENTION: MEMBER AND USES THEREOF

PATENT REFERENCE: 10448-058001

CURRENT FILING DATE: 2001-06-06

PRIOR APPLICATION NUMBER: US 60/209,949

PRIOR APPLICATION NUMBER: US 60/209,949

PRIOR FILING DATE: 2000-06-06

NUMBER OF SEQ ID NOS: 6

SOPTWARE: FastSEQ for Windows Version 4.0

SEQ ID NO 4

LENGTH: 612
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          В
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          õ
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    В
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Š

Patent No. US20020119489A1

Patent No. US20020119489A1

GENERAL INFORMATION:
APPLICANT: Lockridge, Oksana
APPLICANT: Matkins, Jeffry D.
APPLICANT: Matkins, Jeffry D.
TITLE OF INVENTION: Butyrylcholinesterase Variants and
TITLE OF INVENTION: Methods of Use
TITLE OF INVENTION: Methods of Use
TILE REFERENCE: P-1X 4143

CURRENT APPLICATION NUMBER: US/09/748,739A

CURRENT FILING DATE: 2000-12-06
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Ş

Pred. No. is the number of results predicted by chance to have a

score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
